

ARCHITECTURE TRIP TO BRAZIL

FROM 30 NOVEMBER TO 10 DECEMBER

ARCHITECTURAL TRIP TO BRAZIL 2023

This "**Architectural Journey to Brazil**" - is organized around 3 major Brazilian cities: São Paulo, Brasília and Rio de Janeiro, where you can appreciate the diversity of this unique country.

São Paulo is a vibrant metropolis with a multitude of galleries, museums and cultural centers, as well as an active urban culture and interesting architecture, being the origin of the Paulista school. Lina Bo Bardi, Vilanova Artigas and Oscar Niemeyer are some of the architects who have left an important architectural legacy to the city.

Brasília is the state capital and seat of the federal government, and the urban planning of its Monumental Axis, with its characteristic bird-shaped plan defined by Lucio Costa, where most of the monuments and government buildings are located, is a landmark of mid-20th century modern urbanism.

Several of Niemeyer's major works are located in the city, such as the Palace of Congress, the Planalto Palace, the Cultural Complex of the Republic and the Cathedral of Brasília.

Rio de Janeiro, not by chance called La Cidade Maravilhosa, stands out for its privileged landscape, its beaches, its unique character and its architecture. In this field, buildings such as the MAC in Niteroi, the landscape proposals of Burle Marx, the 2016 Olympic works, as well as several interesting examples of contemporary architecture built in recent years stand out.

In short, this trip represents a unique opportunity to delve into this fascinating country and get to know its culture and architecture.
